Complete List of ChatGPT Plugins (And How To Use Them)

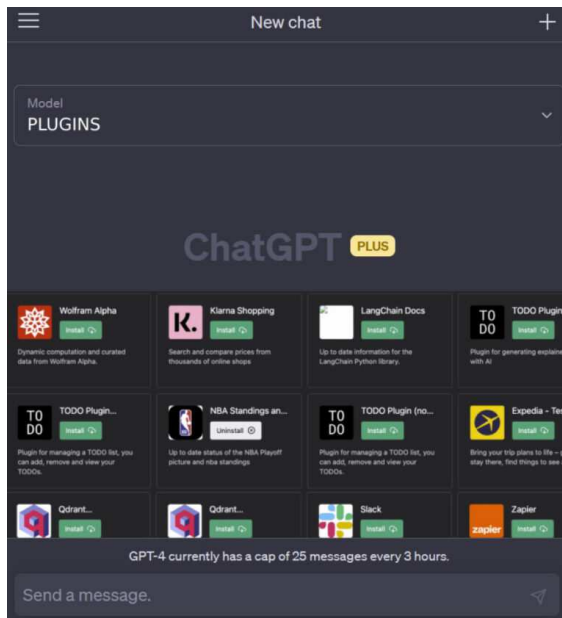

👤 Dils   May 18, 2023

ChatGPT plugins are officially being rolled out to ChatGPT users.

By giving ChatGPT access to real-time data, people are excited (and concerned) about the potential for plugins to completely disrupt the way we use the internet.

Many are likening plugins to Apple's revolutionary launch of the App Store. The more you consider the possibilities, the more this comparison makes sense.

This article is a list of all the current ChatGPT plugins at the time of writing. We'll show you what they are and how they can be used with real life examples

Make sure you check out each plugin because you never know... one of these plugins might just save you lots of time and money this year.

List of ChatGPT Plugins
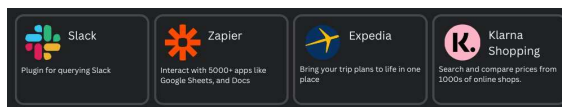

1. Slack: Querying Slack

Imagine being in a remote team and having to find a specific piece of information shared in a past Slack conversation. Instead of wasting time scrolling through endless chats, you can now query Slack directly from ChatGPT to find the needed information quickly and efficiently.

Prompt example: "Find all messages containing the keyword 'deadline' in the #project channel."

2. Zapier: Interact with 5000+ apps

Let's say you're a project manager who constantly switches between Google Sheets, Docs, and other productivity apps. The Zapier plugin lets you interact with all these apps directly within ChatGPT, dramatically streamlining your workflow and increasing efficiency.

Google Bard Vs ChatGPT: Is ChatGPT Dead?

How To Use MusicLM (Make AI Music For Free)

Prompt example: "Send a new row of data to Google Sheets," or "Turn new Trello card assignments into Todoist tasks."
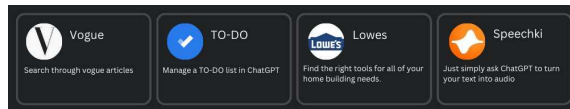

3. Expedia: Save time planning vacations

Planning a trip can be daunting, with multiple websites and apps to juggle. Imagine being able to coordinate your entire trip — flights, accommodation, activities — all from one place within ChatGPT, making your trip planning process seamless and stress-free.

Prompt example: "Find round trip flights from Los Angeles to Tokyo for next month," or "Book a hotel in Paris for my trip on June 5th."

4. Klarna Shopping: Search and compare prices

Picture this: you're hunting for a new laptop, but you want to ensure you're getting the best deal. Using the Klarna Shopping plugin, you can search and compare prices from thousands of online shops right from ChatGPT, saving both time and money.

Prompt example: "Compare prices for Apple MacBook Pro," or "Find the cheapest online store for a Samsung Galaxy S21."

Vogue	TO-DO	Lowes	Speechki
Search through vogue articles	Manage a TO-DO list in ChatGPT	Find the right tools for all of your home building needs.	Just simply ask ChatGPT to turn your text into audio

5. Vogue: Search through Vogue articles

Imagine being a fashion enthusiast who loves reading Vogue. Instead of manually browsing, you can now search and pull up Vogue articles directly within ChatGPT, making your fashion research more efficient and enjoyable.

Prompt example: Find Vogue articles about latest fashion trends," or "Search for an interview with Anna Wintour in Vogue."

6. TODO plugin: Manage a TO-DO list

Consider a busy entrepreneur juggling multiple tasks. With the TODO plugin, they can manage their to-do list right within ChatGPT, ensuring nothing slips through the cracks.

Prompt example: Add 'Finish project report' to my to-do list," or "Show me my tasks due today."

7. Lowes: Find the right tools for home building needs
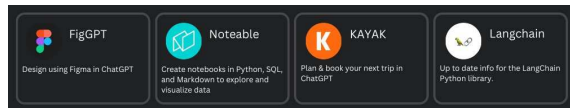

If you're a DIY enthusiast planning a new project, imagine using the Lowes plugin to find the right tools and materials directly within ChatGPT. No more switching between websites or apps, just straightforward and efficient planning.

Prompt example: "Search for cordless drills," or "Find prices for Sherwin-Williams paint."

8. Speechki: Turn text into audio

Imagine being a student who needs to review notes but is tired of reading. With the Speechki plugin, they can simply ask ChatGPT to turn their notes into audio, making study time more versatile and accessible.

Prompt example: "Turn my text into audio," or "Read out my notes on 'Quantum Physics'."

FigGPT	Noteable	KAYAK	Langchain
Design using Figma in ChatGPT	Create notebooks in Python, SQL, and Markdown to explore and visualize data	Plan & book your next trip in ChatGPT	Up to date info for the LangChain Python library.

9. FigGPT: Design using Figma in ChatGPT

With FigGPT, designers can generate ideas, compose and edit copy, summarize design contents, and change styles, all within Figma or Figjam. One standout feature is its ability to populate components with sample data, enhancing the prototyping process and making it more efficient.

Prompt example: "Write a headline for this product page," or "Populate components with sample data."

10. Noteable: Create notebooks in Python, SQL, and Markdown

Data scientists and analysts often have to switch between different languages and tools. With the Noteable plugin, they can create notebooks in Python, SQL, and Markdown right within ChatGPT, streamlining their analysis and visualization processes.

Prompt example: "Create a new Python notebook," or "Run SQL query in my existing notebook."

11. KAYAK: Plan & book your next trip

Imagine being a busy professional planning a vacation. With the KAYAK plugin, you can plan and book your entire trip — flights, hotels, car rentals — directly within ChatGPT, making your travel planning more efficient and enjoyable.

12. LangChain Docs: Up-to-date info for the LangChain Python library

For developers using the LangChain Python library, imagine having access to the most up-to-date information and documentation without leaving ChatGPT. This integration saves time and helps developers stay on track with their projects.

Prompt example: "Find documentation for the 'translate' function," or "Show me examples of how to use LangChain."
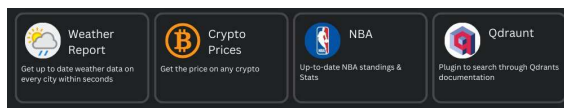

13. Weather report: Get up-to-date weather data

Picture yourself planning an outdoor event and needing to know the weather forecast. Using the Weather report plugin, you can quickly access up-to-date weather data for any city within seconds, making your planning process smoother.

Prompt example: "What's the weather in New York today?" or "Give me a 5-day forecast for San Francisco."

14. Crypto Prices: Get the price on any crypto

As a cryptocurrency investor, imagine being able to instantly access the latest prices for any digital currency, without leaving ChatGPT. This real-time information helps you make more informed decisions on your investments.

Prompt example: "What's the current price of Bitcoin?" or "Show me the price trend of Ethereum in the last month."

15. NBA: Up-to-date NBA standings & stats

If you're an NBA fan, imagine being able to quickly access the latest standings and stats of your favorite teams and players directly within ChatGPT. This plugin keeps you updated without having to search through multiple websites or apps.

Prompt example: "Who won the Lakers game last night?" or "Show me the current NBA standings."

16. Qdrant: Search through Qdrant's documentation

Developers using Qdrant can now easily search through its documentation right within ChatGPT. This eliminates the need to browse multiple pages and helps developers find the information they need quickly.

Prompt example: "Find Qdrant's documentation on 'vector search'," or "Show me examples of how to use Qdrant."

17. Open Table: Search and book restaurants

Imagine being able to search for and book your favorite restaurants directly within ChatGPT. The Open Table plugin simplifies your dining experience, making it easier to enjoy a night out.

Prompt example: "Book a table for two at The French Laundry tomorrow night," or "Find Italian restaurants near me."

18. Zilliz Plugin: Search through your documentation

For professionals dealing with large volumes of documentation, the Zilliz plugin lets you search through and interact with your documents seamlessly within ChatGPT, saving you time and increasing productivity.

Prompt example: "Search for 'product specifications' in our documentation," or "Find the document named '2023 Project Plan'."

19. Wolfram: Access computation, math, curated knowledge, and real-time data

Picture a researcher needing access to computational tools, mathematical functions, and curated knowledge. The Wolfram plugin enables them to access all these resources directly within ChatGPT, making their research process more efficient and effective.

Prompt example: "Calculate the integral of x^2," or "Show me the population data of France."

20. Pricerunner: Get the perfect shopping suggestions

Imagine being a busy shopper looking for the best deals on products. With the Pricerunner plugin, you can get personalized shopping suggestions right within ChatGPT, saving time and money.

21. DesignerGPT: Generate a website within ChatGPT

For entrepreneurs and small business owners needing a website, the DesignerGPT plugin allows them to generate a professional-looking website directly within ChatGPT, without the need for expensive designers or developers.

Prompt example: "Generate a minimalist website design," or "Create a design for an e-commerce site."

22. Milo Family AI: Turn any 20 minutes with your kids into magic

Parents can now transform their quality time with their children into magical experiences using the Milo Family AI plugin. It helps parents plan engaging and educational activities for their kids, all within ChatGPT.

Prompt example: "Suggest a 20-minute educational activity for a 7-year-old," or "Plan a fun science experiment for kids."

23. Chess: Play chess in ChatGPT

Chess enthusiasts can now play a game of chess directly within ChatGPT using the Chess plugin. It's a great way to practice and improve your skills while having a friendly AI opponent at hand.

Prompt example: "Show me the best move in the current position." or "Give me suggestions on how I could improve my end game."

24. Instacart: Order groceries from your nearby store

Imagine being able to order groceries from your nearby store directly within ChatGPT. The Instacart plugin makes grocery shopping more convenient, saving you time and effort.

Prompt example: "Order milk, eggs, and bread from my local store," or "Find the best deals on organic fruits in nearby stores."

25. Send Email: Send the perfect emails through ChatGPT

Imagine having to send an important business email, but you're unsure of the right words to use. With the Send Email plugin, you can draft and send professional, effective emails right within ChatGPT.

Prompt example: "Draft a business email about project updates," or "Send an email to John about the meeting tomorrow."

26. FiscalNote: Access real-time data sets for legal and political purposes

As a policy analyst, having real-time data access is crucial for informed decision-making. The FiscalNote plugin allows you to access datasets related to legislation, regulation, and court cases, right within ChatGPT.

Prompt example: "Access the latest data on climate change legislation," or "Find data on recent court cases related to intellectual property."

27. DAN: Change ChatGPT's personality

Imagine wanting to make your interaction with ChatGPT more engaging by changing its personality. With the DAN plugin, you can customize ChatGPT's personality to make your conversations more enjoyable and personalized.

Prompt example: "Change ChatGPT's personality to sound more humorous," or "Adjust ChatGPT to respond like a professional consultant."

28. United Nations: Search through select UN documents

Researchers studying international relations or human rights can now access select UN documents directly within ChatGPT using the United Nations plugin. This tool can greatly improve their research efficiency.

Prompt example: "Search for UN documents on climate change," or "Find the latest UN reports on human rights."

Startups looking to achieve product-market fit and scale their user base can use the Kraftful plugin to gain insights and strategies within ChatGPT, thereby accelerating their growth.

Prompt example: "Provide strategies for achieving product-market fit," or "Show me how to scale user base effectively."

30. Golden: Customize to your needs

Imagine having an AI tool that can be customized to meet your unique needs. With the Golden plugin, you can tailor your ChatGPT experience, making it more efficient and personalized.

Prompt example: "Customize ChatGPT to prioritize tech news," or "Set up ChatGPT to alert me about the latest research in AI."

31. Tutory: Access tutoring anytime, anywhere

Students needing help with their studies can now access quality tutoring services anytime, anywhere using the Tutory plugin within ChatGPT.

Prompt example: "I need a math tutor for calculus," or "Can you find a tutor to help with English literature homework?"

32. Shimmer: Track meals and get healthier options

Imagine being able to track your meals and receive healthier meal options tailored to your preferences right within your chat. The Shimmer plugin enables users to manage their dietary habits and make healthier choices seamlessly.

Prompt example: "Log today's meals and suggest healthier alternatives," or "What are some healthy meal options for dinner?"

33. One Word Domain: Describe your business and get the perfect one word domain for it.

As an entrepreneur starting a new venture, the One Word Domain plugin can help you come up with a catchy, one-word domain name that best describes your business, all while interacting with ChatGPT.

Prompt example: "Find a one-word domain for a tech startup called 'Innovate AI'," or "Suggest a catchy one-word domain for a coffee shop."

34. Redfin: Do housing market research for your next house or investment.

Real estate investors can use the Redfin plugin to conduct comprehensive housing market research. From price trends to neighborhood demographics, this plugin can provide valuable insights, all within the ChatGPT interface.

Prompt example: "Show me the housing market trends in San Francisco," or "Find available houses in the $300k – $400k range in Austin."

35. Portfoliopilot: This is your all-in-one investing guide.

Portfoliopilot can transform ChatGPT into a personal investment advisor. Users can get investment guidance, learn about different investment strategies, and make informed financial decisions right within their chat interface.

Prompt example: "Guide me on investing in stocks," or "Teach me about value investing."

36. Zillow: Search listing, home details and more

Individuals looking for a new home can use the Zillow plugin to search listings, view home details, compare prices, and even schedule viewings, all within ChatGPT, simplifying the home buying process.

Prompt example: "Find 3 bedroom houses for sale in Seattle," or "Show me apartment listings in New York City within the $2000 budget."

37. Giftwrap: Get gift ideas, shop them and ship it all in one platform.

With the Giftwrap plugin, users can describe the person they want to give a gift to and receive personalized gift recommendations. They can even shop for the gift and arrange shipping, all within their ChatGPT interface.

Prompt example: "Suggest a gift for a 10-year-old who loves science," or "Find a unique birthday gift for my wife who loves art."

38. Tasty: Discover new recipes and meal plans that work for you.

Food enthusiasts can use the Tasty plugin to discover new recipes, plan meals, and even get personalized meal suggestions based on their dietary preferences and restrictions, making cooking a more enjoyable experience.

Prompt example: "Find a recipe for vegan lasagna," or "Suggest a meal plan for a gluten-free diet."

39. Hauling Buddies: Find trusted animal transporters in your area

Pet owners moving homes or needing to transport their pets can use the Hauling Buddies plugin to find reliable and trusted animal transport services in their area, ensuring their pets' safety and comfort.

Prompt example: "Find trusted animal transporters in San Francisco," or "Get a quote for pet transport from Los Angeles to Denver."

40. Tablelog: Find restaurants in Japan with availability at any moment

Travelers in Japan can use the Tablelog plugin to find restaurants with real-time availability, making dining out more convenient and enjoyable.

Prompt example: "Find a sushi restaurant in Tokyo that's open now," or "Book a table for two in Osaka tonight."

41. Yabble: Create surveys, collect data and analyze

Researchers can utilize the Yabble plugin to design and distribute surveys, collect data, and even perform initial data analysis, all within ChatGPT, making research processes more efficient.

Prompt example: "Create a survey on customer satisfaction for our product," or "Analyze the data from the recent market research survey."

42. Algorithma: Virtual life in an immersive simulator

With the Algorithma plugin, users can simulate life scenarios, explore different outcomes, and make more informed decisions in their real lives, all within the immersive environment provided by ChatGPT.

Prompt example: "Simulate the outcome if I choose to invest in real estate vs stocks," or "Create a life scenario where I move to a different city for a job."

43. Vivian Health: Healthcare job in the area you want

Healthcare professionals seeking new opportunities can use the Vivian Health plugin. By simply stating their job preferences, location, and specialty, they can get a list of suitable job openings in their desired area, all within their conversation with ChatGPT.

Prompt example: "Find nursing jobs in Chicago," or "Show me available physical therapist positions in New York City."

44. CreatiCode: Display scratch programs as images & write 2D/3D programs

Educators teaching programming could use the CreatiCode plugin with ChatGPT to aid their lessons. Students could write simple Scratch programs within the chat, display them as images for visual aid, and even explore more complex 2D and 3D programming concepts.

Prompt example: "Create a Scratch program to make a sprite move left and right," or "Help me write a 2D game in Python using Pygame."

45. Argil Ai: Generate images in ChatGPT

Artists and graphic designers could use the Argil Ai plugin to generate images while conversing with ChatGPT. By describing the image they have in mind, the plugin could generate a visual representation, offering a unique, creative tool within the chat interface.

Prompt example: "Generate an image of a sunset on the beach," or "Create a futuristic city skyline based on my description."
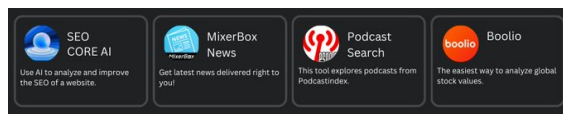

46. SEO CORE AI: Optimize your website's SEO

Picture this: you're a budding entrepreneur with a small business, and you just launched your website. However, you're unsure about how SEO-friendly it is. This is where the SEO CORE AI plugin comes in. It uses AI to analyze your website's SEO and gives you comprehensive suggestions on how to improve it.

Prompt example: "Analyze and suggest improvements for the SEO of my website."

47. MixerBox News: Staying informed

Imagine you're a busy professional who hardly has the time to catch up on current affairs. With the MixerBox News plugin, you can now have the latest news delivered to you right within ChatGPT.

Prompt example: "Show me the latest headlines," or "Get me news updates on the stock market."

48. Podcast search: Discovering new podcasts

Are you an avid podcast listener always on the lookout for new content? With the Podcast search plugin, you can easily explore podcasts from Podcastindex, finding your next binge-listen effortlessly.

Prompt example: "Find podcasts on self-development," or "Find popular comedy podcasts."

49. Boolio: Analyzing global stock values

Succeeding in the stock market requires you to keep a close eye on how the prices are moving. The Boolio plugin makes it easy for you to analyze global stock values, helping you make more informed investment decisions.

Prompt example: "Show me the current value of Microsoft stocks," or "Analyze the stock trends for Amazon."

50. Tomorrow Io: Planning according to the weather

Let's say you're planning a weekend outing, but you're unsure about the weather. The Tomorrow Io plugin can give you the weather forecast, and help you plan and adapt your activities accordingly.

Prompt example: "What clothes should I take on my vacation to New York this weekend?" or "Will it rain tomorrow in Seattle?"

51. Open Lecture: Accessing academic content

Imagine you're a student struggling with a specific topic. The Open Lecture plugin helps you discover and access specific moments in open lectures, aiding your learning process.

Prompt example: "Find a lecture on quantum mechanics," or "Show a lecture explaining the theory of relativity."

### 52. ChatWithVideo: Interacting with YouTube videos

You're a tech enthusiast looking to understand the latest gadgets through reviews on YouTube. The ChatWithVideo plugin allows you to ask questions, analyze, and parse through YouTube videos, enhancing your understanding.

Prompt example: "Find a review video for the latest iPhone model," or "Analyze the video for key points about its performance."

53. GameBase: Getting gaming info

You're a gamer looking for information about a new game. The GameBase plugin helps you chat and get game info right within ChatGPT, making your search process easier.

Prompt example: "Get me information on the game 'Cyberpunk 2077'," or "Find me reviews for the game 'Red Dead Redemption 2'."
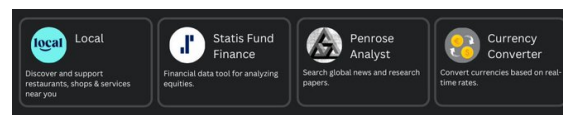

54. Local by GoodCall: Supporting local businesses

Let's say you've just moved to a new neighborhood and want to support local businesses. The Local by GoodCall plugin helps you discover restaurants, shops, and services near you.

Prompt example: "Show me local restaurants in Brooklyn," or "Find shops near me."

55. Statis Fund Finance: Analyzing financial data

Suppose you're a finance professional who needs up-to-date financial data. The Statis Fund Finance plugin offers a financial data tool for analyzing equities, making your job much easier.

Prompt example: "Show me the equity analysis for Tesla," or "Get me the financial data for Alphabet Inc."

### 56. Penrose Analyst: Staying informed on global affairs

Perhaps you're a policy analyst needing to keep abreast of global news and research papers. The Penrose Analyst plugin helps you search global news and research papers right within ChatGPT.

Prompt example: "Find recent research papers on climate change," or "Show me the latest global news on cybersecurity."

57. Currency Converter: Dealing with foreign currencies

Imagine you're planning a trip abroad and need to convert currencies based on current rates. The Currency Converter plugin makes this process straightforward and accurate.

Prompt example: "Convert 100 USD to Euros," or "What's the current exchange rate between Japanese Yen and British Pounds?"
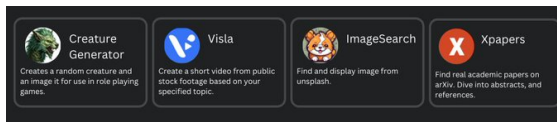

58. Creature Generator: Role playing game enhancement

You're a Dungeon Master preparing for the next game night. The Creature Generator plugin can create random creatures for use in your role-playing games, making your session more dynamic and unpredictable.

Prompt example: "Generate a random creature for a forest encounter," or "Create a mythical beast for a boss battle."

59. Visla: Creating videos

You're a content creator and need to quickly generate a video for your social media platforms. The Visla plugin allows you to create a short video from public stock footage based on your chosen topic.

Prompt example: "Create a short video about coffee brewing techniques," or "Generate a video showcasing tropical beaches."

### 60. ImageSearch: Visual inspiration and information

Perhaps you're a graphic designer in search of inspiration for your next project. The ImageSearch plugin can find and display images from Unsplash, providing you with a broad range of high-quality visuals.

Prompt example: "Find images of modern architecture," or "Display pictures of vintage typography."

61. Xpapers: Academic research

You're a university student in need of scholarly articles for your research paper. The Xpapers plugin allows you to find real academic papers on arXiv, making your research process easier and more effective.

Prompt example: "Find papers on the effects of climate change on biodiversity," or "Show me the latest research on artificial intelligence."
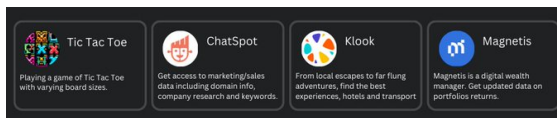

62. Tic Tac Toe: Quick gaming fun

You're in need of a quick break from work…. The Tic Tac Toe plugin in ChatGPT lets you engage in a quick game right within the chat, giving you a fun and simple diversion.

Prompt example: "Start a new game of Tic Tac Toe".

63. ChatSpot: Access to marketing data

You're a marketing professional in need of sales data, company research, and keyword analysis. The ChatSpot plugin gives you access to all this data within ChatGPT, significantly enhancing your workflow.

Prompt example: "Get me sales data for Q1 2023," or "Show me the top trending keywords in the technology sector."

64. Klook: Planning travel experiences

Let's say you're planning your dream vacation and looking for unique experiences, tours, hotels, and transport options. The Klook plugin makes this planning process convenient and enjoyable.

Prompt example: "Find the best experiences in Rome," or "Book a hotel in Bali for my trip next month."

65. Magnetis: Digital wealth management

Suppose you're new to investing and need help managing your investments. The Magnetis plugin is a digital wealth manager that can guide you through your investment journey, making it less intimidating and more efficient.

Prompt example: "Show me my portfolio performance," or "Suggest adjustments to my investment portfolio."

66. SEO app: SEO made easy

Imagine you're a blogger, wanting to optimize your blog posts for SEO. The SEO app plugin acts as your personal SEO assistant, guiding you through the process of making your content more SEO-friendly.

Prompt example: "Optimize my latest blog post for SEO," or "Check the SEO of my website."

67. Abridged Due Diligence: Financial analysis

Let's say you're a financial analyst needing to conduct due diligence for potential investments. The Abridged Due Diligence plugin allows you to search through recent SEC filings, providing links to deeper analysis to make your research more comprehensive.

Prompt example: "Find the latest SEC filings for Tesla Inc.," or "Show me in-depth analysis of Amazon's latest financial report."

68. CreditYelp: Financial calculations

Perhaps you're a homeowner planning to refinance your mortgage. The CreditYelp plugin provides you with access to essential financial calculators, helping you make informed decisions.

Prompt example: "Calculate the monthly payment for a 30-year mortgage with a 2.5% interest rate," or "Calculate the total interest paid over the life of my loan."

69. PortfoliosLab: Financial portfolio analysis

Suppose you're an investor looking to analyze your diverse portfolio that includes stocks, ETFs, funds, and crypto. The PortfoliosLab plugin can help, providing you with a detailed analysis of your holdings.

Prompt example: "Analyze my portfolio's performance," or "Compare my portfolio against the S&P 500."

70. DAIZY: Asset performance insights

Imagine you're an asset manager needing insights on asset performance, risk, and sustainability. The DAIZY plugin helps you gather this information, allowing you to make data-driven decisions.

Prompt example: "Show me the risk analysis of my current assets," or "Provide sustainability report for my portfolio."

71. Giga Tutor: Personalized tutoring

You're a student struggling with your calculus homework. The Giga Tutor plugin provides AI-powered personalized tutoring, giving you the answers you need, tailored to your level of understanding.

Prompt example: "Solve this calculus problem for me," or "Explain the concept of differential equations."

72. Clinical Trial Radar: Clinical trial information

Suppose you're a healthcare professional researching new treatments for a specific disease. The Clinical Trial Radar plugin offers information on global clinical trials, organizations, and diseases, helping you stay informed about the latest advancements.

Prompt example: "Show me the latest clinical trials on Alzheimer's disease," or "Find organizations conducting cancer research."

73. FundsDB: Finding funding opportunities

Imagine you're an entrepreneur in India looking for funding opportunities. The FundsDB plugin helps you discover such opportunities in the UK and India, increasing your chances of securing funding.

Prompt example: "Find funding opportunities for tech startups in India," or "Show me UK grants available for green initiatives."

74. Career Copilot: Job hunting made easy

You're a software developer seeking a better job. The Career Copilot plugin acts as an always-on assistant, helping you find and apply for suitable positions, easing your job

hunting process.

Prompt example: "Find software developer jobs in San Francisco," or "Apply for the software engineer position at Google."

75. I Am Rich: It does absolutely nothing

This is a bit of a weird one. Tell it you're rich, and it will give you an image "to celebrate your success". That's all it does. You can thank me for saving you a GPT-4 message by subscribing to the WGMI newsletter.

Prompt example: "I am rich!"

76. Creatuity Stores: Streamlined online shopping

Suppose you're an avid online shopper looking for specific products. The Creatuity Stores plugin integrates multiple online stores, allowing you to search for products across all of them at the same time, significantly simplifying your online shopping experience.

Prompt example: "Find Nike running shoes across all stores," or "Compare prices for Apple iPhone across different online stores."

77. RoboAd: AI-powered Ad assistance

You're a digital marketer in need of assistance with your ad campaigns. The RoboAd plugin serves as your AI-powered Ad Assistant, helping you create, analyze, and optimize your online ads for better results.

Prompt example: "Create a new Facebook ad campaign," or "Analyze the performance of my Google Ads campaign."

78. Photorealistic: Creating prompts for illustrations

Suppose you're an illustrator requiring inspiration for your next project. The Photorealistic plugin generates prompts for your illustrations, pushing your creativity to new heights.

Prompt example: "Generate a photorealistic prompt for a cityscape illustration," or "Create a prompt for a fantasy-themed drawing."

79. Competitor PPC Ads: Uncover competitors' advertising strategies

Have you ever been curious about your competitors' ad strategies? The Competitor PPC Ads plugin lets you discover your competitors' ads just by entering their website, providing you with insights to inform your own advertising strategy.

Prompt example: "Show me the ads run by my competitor www.xyz.com," or "Analyze the PPC ads strategy of www.abc.com."

80. QuakePH: Staying informed about earthquakes

Let's say you're living in the Philippines, a country prone to seismic activity. The QuakePH plugin keeps you updated with the latest earthquakes, ensuring you're well-informed and prepared.

Prompt example: "Show me the latest earthquake updates in the Philippines," or "What was the magnitude of the last earthquake in Manila?"

81. CoinCap: Cryptocurrency information

You're a cryptocurrency enthusiast who wants to keep track of current market conditions. The CoinCap plugin provides you with up-to-date cryptocurrency information, enabling you to make informed trading decisions.

Prompt example: "What's the current price of Bitcoin?" or "Show me the top 10 cryptocurrencies by market cap."

82. Zumper Rental: Finding a rental home

Next time you want to make a move, make sure you test out this plugin. The Zumper Rental plugin simplifies this process, helping you find the perfect home to fit your needs.

Prompt example: "Find 2-bedroom rental homes in Toronto within a $2000 budget," or "Show me pet-friendly apartments in San Francisco."

83. Decision Journal: Making better decisions

You're a manager striving to improve your decision-making skills. The Decision Journal plugin allows you to keep track of your decisions and review them periodically, fostering more conscious and effective decision-making habits.

Prompt example: "Record my decision to hire a new team member," or "Review my

decisions from last month."
